This timetable has been designed to allow certain subjects to have projects at a time that fits with the topics they are teaching. Certain subjects are not included in the extended homework timetable.

- English and Maths and Science set a weekly homework.
- MFL sets a weekly homework, alternating between vocabulary practice and written work.
- Geography and D&T set a fortnightly homework.
- In PE, formal homework is not set, ongoing feedback is given on practical activities
- ICT will set regular homework for the first term and then review this

In addition to these extended homework projects, subjects may occasionally set additional homework, for example to revise or consolidate a piece of work.

Projects have been given a two week slot to allow for balancing other homework at the same time.

As a guideline a student should spend a minimum of 2 hours on a project.

Students will be reminded every week by their form tutors about the homework, in addition a copy of this timetable and homework projects can be found on the school website.
